Export Packing Principles

- Neutral outer packing can be prepared without Chinese text when required by the buyer.
- Stretch-film protection can be used so the plywood case reaches the terminal side in a cleaner condition.
- Packing photos and pre-shipment proof can be provided after customer labels, order references, and private marks are removed.

Before Shipment Review

- Product condition, surface protection, packing method, crate condition, and shipment readiness are checked before dispatch.
- For privacy-safe public evidence, YIYI removes customer names, shipping marks, email records, order numbers, private labels, and faces.

Privacy note: drawings, old belt photos, project dimensions, shipment photos, and buyer records are used only for technical review and quotation preparation. Public materials do not include customer names, order numbers, shipping marks, private labels, or faces.
