

FACTORY FACTS

ON-SITE SOLAR INSTALLATION FACTS

Ningjin, Shandong, China
Ningjin Yiyi Mesh Belt Co., Ltd.

PROVEN · STABLE · VERIFIED

Facility Overview

27,000 m²

Site Area

12,000 m²

Workshop Area

6,000 m²

Solar Installation Area

Solar Installation on Site

6,000 m² solar installation area

Our factory site includes a 6,000 m² solar installation area. We state the installed area only: it does not mean that production is 100% solar-powered, and it is not a carbon-neutral or zero-emission claim.

Solar area: 6,000 m²

Site area: 27,000 m²

Workshop area: 12,000 m²

What We Can Share With Your Team

If your company reviews supplier sustainability or carbon data, we share verified factory facts only. Figures we have not yet recorded are marked as pending, never estimated.

01

Verified facility facts

Site area 27,000 m², workshop area 12,000 m² and solar installation area 6,000 m².

02

Data still to be confirmed

Installed capacity, annual generation and the share of factory electricity are not published yet. Please ask before using any figure.

03

Order documents

Material documentation and inspection records are agreed for each order. Send your requirements with the enquiry.

Built to Your Drawing, Checked Before Packing

Every formal order follows your approved drawing, trial production and first-article confirmation, and receives a 100% final inspection before packing.

Material control

Each incoming material batch is checked with steel-mill documentation, spectral testing and hardness testing.

Process control

First-article confirmation, in-process inspection and production dimension records.

Final inspection

Pitch, width, length, flatness, welds and cleanliness are checked on every formal belt before packing.

Core belt forming, welding and quality control are managed in-house; selected specialist processes are sourced to our specifications.
